ECCC HR-to-Pay Stabilization Dashboard: June 2020

Timeliness / Data Entry

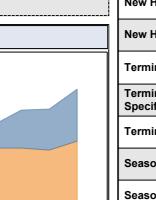

Phoenix Pending Section 34 Transactions

- A significant proportion of these transactions are system-generated in error.
- On October 7, 2019, PSPC implemented a system correction to delete all erroneous, system-generated pending transactions. A drop of 7,000 pending transactions followed.
- · The February increase in pending transactions (10,000) is the result of the retroactive payout of the MT Night Shift Premiums and duplicate
- Almost all Night Shift Premiums transactions (4,500) have now been approved.
- A future system correction in Phoenix will remove approximately 5,000 "duplicate" transactions. Timeline for this correction has yet to be confirmed
- Number is underestimated as it does not include pending transactions with Time Keepers and Exceptions.

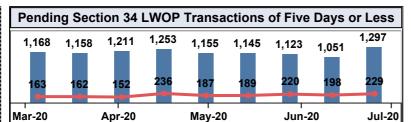

Pending Section 34 Leave Without Pay (LWOP) Transactions of Five Days or Less

- ► ECCC dedicated initiative to focus on LWOP transactions of Five
- ▶ Employees and Section 34 managers are being contacted directly after thorough analysis of the file.
- ▶ Employees that have not selected their Section 34 managers are being contacted directly
- ▶ Discussions with PSPC to improve reporting tools related to these transactions.

Number of Employees Number of Transactions

▶ Indicators proposed by TBS/OCHRO. Developed and approved through HR-to-Pay governance. Identified in EX performance agreements as part of corporate commitment on timely and accurate pay. Monthly reports shared with Branch Heads. ► ECCC HR guidelines (service standards) to support timeliness compliance (on the intranet). ➤ All transactions entered in My GCHR during the month, regardless of their start date.

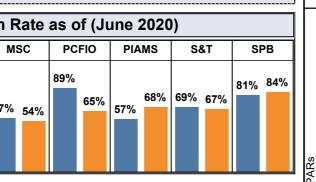

1 Week - 4 Months Over 1 Year 1-5 Days 4 Months - 1 Year

Change Management / Outreach

▶ While all employees are encouraged to take courses 1-3, only Indeterminate, Seasonal, and Term > 3 month employees are tracked for registration

- While all managers are encouraged to take courses 1-4, only managers with Section 34 authority are tracked for Course 4.
- If an individual is not currently in MyGCHR (pending transfer), they will not appear in this report although they may have registered for the training. Individuals that have already left ECCC but have not yet been transferred may still appear in the report as their file remains active in MyGCHR.
- Monthly registration metrics continue to improve for the department.
- Monthly reports provided to Branch Heads.

ECCC HR-to-Pay Stabilization Dashboard: June 2020

Pod Backlog / Queue

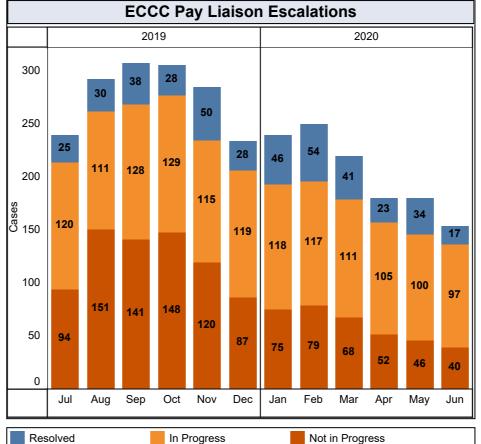

- Since the implementation of the PSPC Pay Pod model in June 2018, the overall number of open pay cases and impacted employees are steadily declining. However, a proportion of new cases are getting old.
- ▶ The most common transaction types in our current queue are: Actings 1,718 and Overpayments Collective Agreement Implementation 813

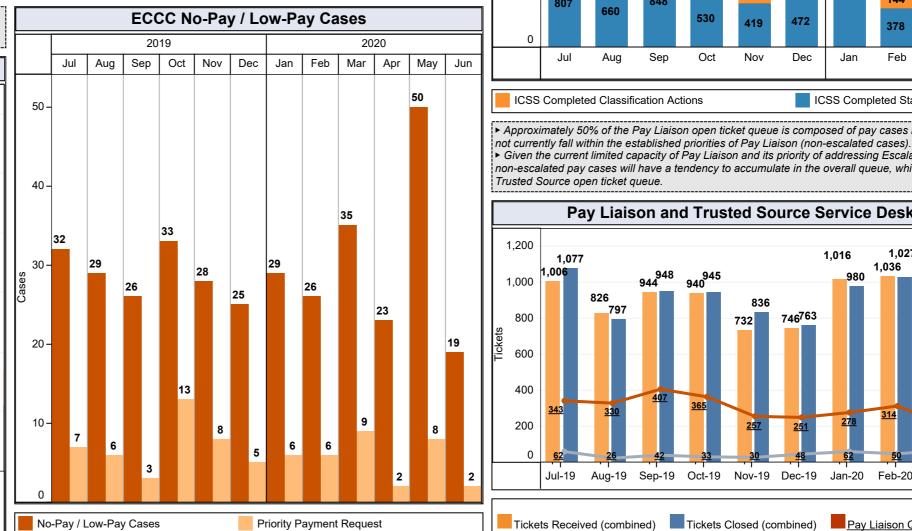

> A proportion of tickets are not being closed within service standards, which is increasing the size of the Pod's overall backlog Tickets opened in April, May, and June 2020 are being closed within service standards. This is the first time this has occurred since the ECCC Pod was introduced in June 2018.

▶ The older the pay case gets, the more complex it becomes to resolve. * Escalated Pay Cases refer to high impact/high risk cases (from a financial and/or personal hardship perspective) in ECCC's backlog that are brought to the attention of the ECCC Pay Liaison team and that fall under the established priorities.

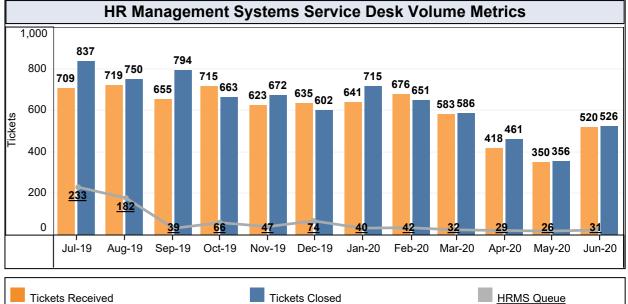

Service Delivery

Tickets Received

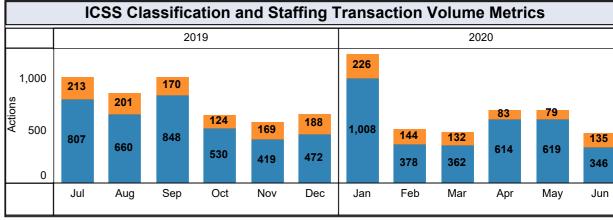

ICSS Completed Classification Actions

▶ Peaks can be explained by higher levels of student recruitment for those particular months (May-Sept-Jan).

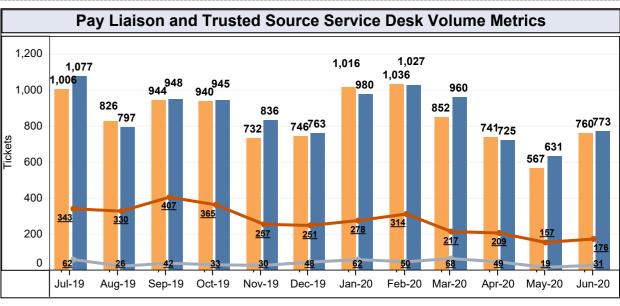

Tickets Closed

▶ Approximately 50% of the Pay Liaison open ticket queue is composed of pay cases identified by ECCC employees that do

ICSS Completed Staffing Actions

> Given the current limited capacity of Pay Liaison and its priority of addressing Escalations and No Pay/Low Pay cases, the non-escalated pay cases will have a tendency to accumulate in the overall queue, which explains why it is higher than the
